Existing Implementations of Pauli Propagation and SectorQ

Shared With Prior Work		Added by This Work		
Where It Runs	**Implementation**	**When Terms Move Between Processes**	**Holds More Terms Than GPU Memory**	**How the Terms Are Split**
One Device	SPD (1 GPU)	Never: One Device	No	—
	PauliPropagation.jl, ppvm, Qiskit pauli-prop (1 Node, CPUs)	Never: One Device	—	—
 Many CPU Nodes	ORQA	At Every Branching Gate	—	Fixed Function
	MonoProp	—	—	—
 Many GPUs	cuPauliProp Distributed Mode	At Every Gate	No	Not Public
	SectorQ (This Work)	*Only at Window Boundaries*	Yes: Host Memory	Chosen at Run Time
