Existing Implementations of Pauli Propagation and SectorQ

Shared With Prior Work		Added by This Work		
Where It Runs	**Implementation** *(Source, Year)*	**When Terms Move Between Processes**	**Holds More Terms Than GPU Memory**	**How the Terms Are Split**
One GPU	**SPD** *(Quantinuum, 2026)*	Never: One Device	No	—
One CPU Node	**PauliPropagation.jl** *(PRX Quantum, 2026)*	Never: One Device	—	—
	ppvm *(QuEra, 2026)*	Never: One Device	—	—
	Qiskit pauli-prop *(Qiskit, 2025)*	Never: One Device	—	—
Many CPU Nodes	**ORQA** *(RIKEN, arXiv 2025)*	At Every Branching Gate	—	Fixed Function
	MonoProp *(Algorithmiq, arXiv 2025)*	—	—	—
Many GPUs	**cuPauliProp Distributed Mode** *(NVIDIA, 2026)*	At Every Gate	No	Not Public
	SectorQ *(This Work)*	***Only at Window Boundaries***	Yes: Host Memory	Chosen at Run Time

— : Not Stated in the Sources Used Here. Year: of the Paper or the Software Citation; Without One, of the Code Version Used.
